[ON LINE REGISTRATION ONLY](#)

Researchers have recently discovered a dangerous biological syndrome caused by abuse and neglect during childhood. As the new documentary *Resilience* reveals, toxic stress can trigger hormones that wreak havoc on the brains and bodies of children, putting them at a greater risk for disease, homelessness, prison time, and early death. While the broader impacts of poverty worsen the risk, no segment of society is immune. *Resilience*, however, also chronicles the dawn of a movement that is determined to fight back.
